**DT100**  
**DT200**

**The DETECTOR Series Radar Units Are Designed for Fixed Installation to Record and Communicate Speeds to a Separate Display or PC.\***

The DETECTOR is available in 2 models; DT100 and DT200.

DT100 is a short-range speed detector with high noise immunity. The advantages of the DT100 include the ability to operate "side-by-side" (8' separation required) without interference from adjacent targets. Applications include Pitching booths, golf nets, hockey nets, etc, where the DT100 can be located directly behind the net.

DT200 is a mid range radar unit for use on baseball fields, tennis courts, traffic monitoring, and a lot more. Designed for indoor or outdoor use, the DT200, coupled with a Sports Radar display, provides fans and participants the real-time speeds of serves or pitches.

\*Requires optional software package

Both of these versatile radar units can collect real-time speed data and send speeds to a PC using our optional software package.

The DETECTOR series can also be customized for specific needs for the OEM that wants to add accurate speed reading/recording to their products. Contact Sports Radar for details.

# DT100 DT200

- ⊙ Speed Range: 10 to 175 MPH (40 to 240 Km/H)
- ⊙ Selectable Output Units in MPH or Km/H
- ⊙ Range:
  - DT100; 8 feet typical
  - DT200; 60 feet typical
- ⊙ Programmable sensitivity/noise filter
- ⊙ Programmable MIN and MAX speed limit settings
- ⊙ Serial communications, 1200 baud
- ⊙ On-board speed storage (EEPROM)
- ⊙ Power from display and data to the display in one cable (25' may be extended as needed)
- ⊙ Custom programming retained in memory
- ⊙ Weather resistant
- ⊙ Includes mounting bracket and tuning fork

**NOTE:** The DETECTOR does not "DISPLAY SPEEDS". The DETECTOR is designed to acquire speeds and send the speed data to a device such as a Sports Radar LED or LCD display, or a PC that can display or process the speed (optional software package required for PC use).

*Optional Display*

1 Year Limited Warranty
